

Activities Explanation

Weather Bag Game -

Use the enclosed worksheet or draw your own "weather related objects." Copy the paper to get a total of four sheets. Cut each paper and put the objects into brown paper bags. Tape each bag to the chalkboard. Divide the class into four teams. Send one member from each team to the bag. Call out a weather phrase. Students have to race to be the first one to pull the correct object from the bag.

Weather Charades-

Put all of the weather phrases on separate small pieces of paper. Have the children divide into two teams. Have one person on the team pick a piece of paper out of a hat. One person from the other team also looks at the paper and plays simultaneously with his or her own team. The student will act out the weather phrase. For example: Hace calor-The student could act as if he or she was sweating, fanning themselves, ect. The first team to yell out the correct phrase scores a point.

Weather Wheel-Please see the worksheet attached. This makes for a great daily exercise.

Weather Mobile-This is a fun "craft" to do with the children. Have them each cut out a large cloud and label it "Tiempo". Attach three pieces of yarn to the cloud. Have children make different weather shapes such as a snowflake, raindrop, and a sun. (Use bright colored construction paper.) Inside the shape have them write the words in Spanish-Sol, Lluvia, or Nieve. Attach the pictures to the end of the pieces of string. Makes a very cute mobile!

Qué Tiempo Hace-This is a great opportunity to practice numbers and complete sentences. Go over the sheet out loud with the students. Point to number one and have them say the temperature and the weather in Spanish. For the older children, have them also write the weather on the line next to the picture. Ex: Son noventa grados y hace sol.
