

Activities Explanation

Bag of Clothing - See the instructions in the Weather portion. This time yell out a season and the child will need to put on the appropriate clothes. For example: For verano you can have flip flops and sunglasses and for spring a rain jacket.

Mata La Mosca- Use the enclosed sheet of Spanish vocabulary words and copy enough for every other student. Each student will have a partner and the sheet is placed between them. Students place hands behind their backs. The teacher will call off a word in Spanish. The first student to touch the correct Spanish word gets a point. Play to five points - and the winners change partners. This is a great way to review vocabulary!

Season Mural- Bring in very large pieces of paper and have the class make a mural of the seasons and label them in Spanish. (This is perfect for any age student.)

Chile Weather Report-Using the enclosed information sheet or other information that you have regarding Chile, have the older students give a weather report for Chile's three regions.

Notas Culturales

- ❖ Show your kids how the earth is divided into hemispheres and how the seasons are actually the opposite. So, when it is summer in Wisconsin, it is winter in Uruguay.
- ❖ Explain to the class what a mural is and how famous they are in Mexico. Diego Rivera makes a great example! After talking about them-make one! See the activities explanation.
- ❖ Chile is a great country to discuss when talking about weather and seasons. So much diversity in a small country!
