Telling time in Spanish includes more math! When talking about the minutes 31-59 we minus the minutes from the coming hour. So, 7:40 would be said 8:00 – 20 minutes, or son las ocho menos veinte. What a great way to practice both Spanish and math at the same time!

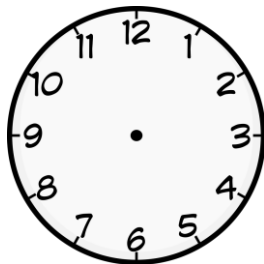

Más Información

Draw the hands on the clocks to show the time given en español.

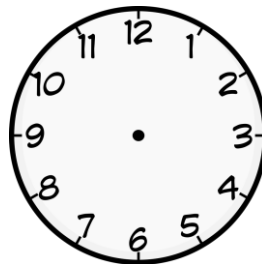

son las tres y
veinticuatro

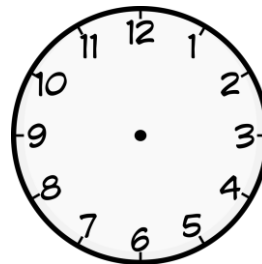

son las seis y
treinta

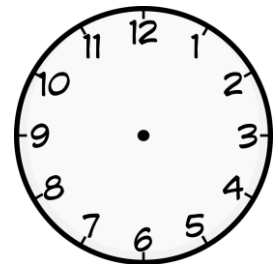

son las siete
menos cuarto

es la una

son las once y
ocho

Answers to last
week's newsletter:

Notas Culturales

United States Americans and Latinos have a slightly different concept of when afternoon begins and ends. It is not uncommon to hear “Son las seis de la tarde,” in Latin American countries; whereas a United States American would say, “6:00 at night.”
