

### **Notas Culturales**

- ❖ Time vs. temperature - Explain to the older students in your class how many words in Spanish have "doble sentidos" or two meanings. Tiempo is a great example!
- ❖ Explain how most Spanish-speaking countries use Celsius to talk about temperatures. Example: In the U.S. we would say it is 72° F, but the same temperature in Spain would be 22° C.
- ❖ Talk with your students about volcanoes. There are many volcanoes in Latin America. One of the most famous and active ones is in Cholula, México. It is called Popocatepetl or "Popo." It still erupts!
