A famous cave in Mexico is *Sótano de las Golondrinas* which means "Basement of the Swallows" in Spanish. This is because the cave is home to many birds and it is a very deep pit, like a basement. The cave is in the State of *San Luis Potosí* in the heart of *La Hausteca*, where Dani and Beto are camping. There are milipedes, scorpions, and snakes in the cave. Puerto Rico also has caves to explore. The Camuy caves are in the northwestern region of Puerto Rico and are one of the biggest cave systems in the world. Another popular tourist destination is the *Cueva Ventana*, which provides a beautiful window view.
