

NIVEL DOS: Los animales

Summative Projects

After teaching the Nivel Dos *los animales* vocabulary, here are two possible projects to conduct with your classes:

1. Zoo Brochure (El folleto del zoológico)

Use the zoo brochure as a graded summative assignment. See the following Futura documents:

- **Zoo brochure (El folleto del zoológico) instructions and checklist**
- **Zoo brochure template**

This brochure can be completed as a stand-alone assessment. If used in conjunction with the Stuffed Animal Zoo Activity, use the brochure to advertise the zoo to your younger students. Young students enjoy viewing the projects of older students and it will help them get excited about their trip to *el zoológico español!*

2. Stuffed Animal Zoo Activity (El zoológico español)

Work collaboratively with your students to create a stuffed animal zoo! Your students will be the zoo workers and younger students and/or school staff can visit as customers. To condense this project, make this a classroom activity and record a video to share with other classes. Use the following Futura documents to help plan your zoo:

- **Zoo sign-up sample** – Divide your zoo into categories and have students sign up to bring in stuffed animals from home. Assign students to different zoo jobs. Give students their job descriptions.
- **Parent communication sample** – Inform parents about this activity so they can help remind students to bring in stuffed animals.
- **Zoo nametag labels** – Make nametags for your students including their job title so they feel very official!
- **Zoo invitation sample** – Invite other classes to visit your zoo. Use the sample invitation to help classroom teachers prepare their students for their visit.
- **El zoológico español slideshow** – See pictures of a Spanish zoo activity conducted in a Futura integrated Spanish class.
